

# Securifor® 4D

The Securifor 4D system's unique feature of front and back alternating wires offers excellent rigidity for high security environments.

## Benefits

### High rigidity

Securifor 4D is the ultimate in heavy weldmesh panel fencing when the highest degree of security is needed. With individual alternating wires (1/1) the panel is 10 times stronger than a flat panel.

### Adequate delay time

Securifor 4D's unique feature of alternating wires makes it cumbersome to cut when a breach is attempted. The small mesh apertures (standard: 12.7 x 76.2mm) offer no toe or finger holds, making it near impossible to climb. This results in a longer delay time between first attempt and possible breach, offering response teams and reaction mechanisms adequate time to deploy and intercept effectively.

### Visibility

Securifor 4D offers excellent visibility through the fence, essential for use with CCTV and surveillance systems.

### Discreet

Securifor 4D has a minimal visual impact on the environment due to its sleek and clean design. Our many colour options can be incorporated into an overall look and feel, if required.

## Product detail

## Functionalities

## Security level

(when compared to other **high security panel** options)

## Post and fixing systems

(post shape illustrated below)

### Securifor® Rectangular

Metal posts dimension **80 x 60 x 2.5mm** or **120 x 60 x 3mm** (depending on the post length) with plastic cap on top. The posts have a single row of M8 threaded inserts. The panels are fixed using specific spider fixators or full-length cover plates and one-way bolts.

### Bekafix® Ultra

Metal posts dimension **70 x 44mm**, H-shape with hook plastic cap. Coating and post steel strength are higher, for corrosive environment or high fences. Panels are attached to the side of the posts using a metal fixator.

### Bekasecure®

Metal posts dimension **140 x 135 x 4mm**. Front of the post is equipped with a double range of holes **10 x 20mm** and the panels are secured to the posts with a continuous cover plate and specific stainless steel security bolts. The open profile of the post (patented) allows for electrical or fibre optic cabling and is closed on top with a specific metal cap.

- For more information on the above posts, please refer to the relevant product page or flyer

## Panels

Securifor 4D panels are 2823mm width or 2514.6 mm depending on the height. A mesh pattern with alternate wire for heavy security.

- Mesh size: 76.2 x 12.7mm
- Horizontal wire diameter: 4mm
- Vertical wire diameter: 4mm

Securifor 4D-1/1

## Coating technique

Panels are made of pre-galvanised wire (minimum 30g/m<sup>2</sup>) and polyester top layer with a minimum a layer thickness of 100 microns. The PES coating thickness is the average of 10 measurements.

## Colours

Green RAL 6005. Other colours are available on request.

## Gates

The Securifor 4D system is supplied with matching gates using the same high security mesh infill as the fence. Single or double swing gate or sliding gate.

Securifor® 4D range	
Fence height (mm)	Panels width x height (mm)
2000*	2819.4 x 2006.6
2400*	2819.4 x 2413
3000*	2514.6 x 2997.2

\* Complete assortment is MTO. Other heights available on request
