

## Securifor® 4D

### Panels

The Securifor 4D system's unique feature of front and back alternating wires offers excellent rigidity for high security environments.

### Product detail

### BENEFITS

#### **High rigidity**

Securifor 4D is the ultimate in heavy weldmesh panel fencing when the highest degree of security is needed. With individual alternating wires (1/1) the panel is 10 times stronger than a flat panel.

#### **Adequate delay time**

Securifor 4D's unique feature of alternating wires makes it cumbersome to cut when a breach is attempted. The small mesh apertures (standard: 12,7 x 76,2mm) offer no toe- or finger holds, making it near impossible to climb. This results in a longer delay time between first attempt and possible breach, offering response teams and reaction mechanisms adequate time to deploy and intercept effectively.

#### **Visibility**

Securifor 4D offers excellent visibility through the fence, essential for use with CCTV and surveillance systems.

#### **Discreet**

Securifor 4D has a minimal visual impact on the environment due to its sleek & clean design. Our many colour options can be incorporated into an overall look and feel, if required.

### Security level

### Applications

### Functionalities

## Post and fixing systems

Securifor 4D can be installed with three different post types:

### Rectangular post system

80 x 60 x 2,5 mm or 120 x 60 x 3,0 mm (depending on the post length). The posts have a single row of M8 threaded inserts. The panels are fixed using specific fixators or full length cover plates and one-way bolts.

### Bekafix Ultra post system

Lateral fixing of the panels with special metal security clips with bolts. Welded tubular posts (70 x 54 mm) in H-shape with punched holes for positioning/fixing of the panels. Panels are fixed lateral on this post, with special spider fixators and one way bolts. Posts are provided with a plastic cap.

### Bekasecure post system

The Bekasecure post's design and high yield strength steel provide the ultimate in high security, rigidity and ease of installation. Posts are delivered with a double range of wholes 10 x 20 mm and the panel is secured with a continuous cover plate and specific stainless steel security bolts. The open profile of the post allows for electrical or fibre optic cabling and is closed with specific metal cap.

**Profile : 140 x 135 x 4 mm**

## Panel Securifor 4D

Mesh pattern (H x W):

Securifor 4D has a standard mesh of 12,7 x 76,2 mm and standard wire diameters of 4mm.

## Coating technique

Panels made out of galvanised wires. An adhesion coating is given for perfect adhesion with the polyester coating (min. 100 micron).

## Colours

Green RAL 6005.

Other colours are available on request.
